25X1

1. A power transmission line was completed early in 1953, leading from Katowice to Warsaw. The capacity of the line is 280,000 kilowatts. This is already in operation. Power is generated by coal. This line is to be extended to East Prussia and work is in progress.
2. Another line from Poreba to Warsaw, with a capacity of 180,000 kilowatts, has also recently been completed. Electricity for this line is generated by water power.
